BD Trademark/Brand (Alpha) List Key:

This list includes active trademarks as filed in one or more countries. If a trademark is not found on this list or you find a mark that is no longer in use, please contact the [Trademark Group](#).

Unless an exception has been granted, trademarks should be followed by the trademark symbol (™) and an appropriate product descriptor. Please note that the marks below are shown in ALL CAPS as they are pulled from our docketing system. Generally, the trademark and product descriptor should be shown in Initial Caps. If you have questions on how the mark should appear and/or what descriptor should be used, please consult with the appropriate marketing/product manager.

Please note, to align with the new BD Trademark/Branding Guidelines, if a mark is shown on this list with BD, then it should be used with BD in all instances. If a mark is not shown with BD on this list, then it should be used with the BD in the first instance only. Thereafter, use the secondary brand alone.

For more information on proper trademark use, please see the [General Trademark Usage Guidelines](#). For information regarding proper use of the BD Masterbrand on labeling, packaging, IFUs and/or marketing material, please visit the [Design System](#) site on *Maxwell*.
