9<sup>th</sup> September 2022

BD and Safer Sleep LLC are committed to enhancing user experience and simplifying workflow with both BD range of automated dispensing cabinets (ADC) and SAFERsleep<sup>®</sup> OR Anaesthetic Information Management Systems (AIMS).

With this in mind, we are pleased to announce the commencement of an integration project that enables integration of dispensed drugs from the BD Pyxis<sup>™</sup> Anaesthesia Station ES to automatically populate in the SAFERsleep<sup>®</sup> OR AIMS. This interface capability will reduce the need for manual input, as well as enhancing documentation and reconciliation of drugs that were administered, wasted, or returned across both platforms.\*

This development is designed to support greater efficiency, accuracy and completeness of information for anaesthetic record keeping. By integrating and combining best-in-class technologies for both ADC and AIMS, BD and Safer Sleep LLC offer enhanced capabilities that assist in improving medication safety and diversion prevention.\*

For any further queries, please don't hesitate to contact Paul Campbell, Managing Director, Safer Sleep LLC on +64 21 271 9455, or myself using the details below.

Sincerely,

**Raphael Wong**
