

# BD<sup>®</sup> Surgiphor<sup>™</sup> Antimicrobial Irrigation System

# BD<sup>®</sup> Surgiphor<sup>™</sup> Antimicrobial Irrigation System:

The only pre-mixed, terminally sterile dilute povidone-iodine (PVP-I) wound irrigation system

## Surgiphor<sup>™</sup> Irrigation System may help to reduce reliance on IV solutions used for irrigation purposes\*

- Indication: Surgiphor<sup>™</sup> Antimicrobial Irrigation System is intended to mechanically loosen and remove debris, and foreign materials, including microorganisms, from wounds.
- Facilities may consider Surgiphor<sup>™</sup> Irrigation System may be an alternative in certain processes where you currently utilize IV Fluids, such as:
  - Irrigation mixing in the OR (back table) of PVP-I or antibiotics
    - Supports reduced fluid usage and fluid inventory consolidation
  - Pharmacy mixing of irrigation solutions
    - Ready-to-use solution can reduce compounding workload and support conservation of fluids
  - Pulsatile lavage with IV solutions
    - May offer an alternative to pulsed lavage, if appropriate
- BD Surgiphor<sup>™</sup> Antimicrobial Irrigation System is not on allocation
